

TRENDALYZE

Trendalyze-DN Telehealth is a HIPAA-compliant, white-label platform uniquely positioned to bring immediate ROI by allowing healthcare organizations to provide the most advanced Telemedicine experience to their consumers via web and mobile apps.

FEATURES AND BENEFITS

1 Convenience

Availability
Reduced Attrition Rates through alternative appointment options.

Telemedicine Visits
Boost revenue by serving your patients any time over live video.

Secure Medical Records Uploads
Upload labs, prescriptions, videos, radiology files, and open notes as part of the patient's PHR

Social Media Self-Service
Automated Twitter-based self-service applications to increase patient engagement

3 Flexibility

Your Own Hours
Make yourself available online at your convenience

Your Own Price
Determine the pricing model that will work best based on your patient demographics

Your Own Workflow
Customize the experience to match your or organization's style

Your Own App
Get a customized application for the AppStore and PlayStore

2 Compliance

Telemedicine Definition
Defining what each state constitutes as Telehealth/Telemedicine.

Live Video Reimbursement
Based on established state regulation requirements

Cross-State Licensing
Based on individual state rules and licensing requirements

Online Prescribing
Based on individual state regulation

4 Innovation

Remote Monitoring Programs
Aimed at reducing hospital readmissions while ensuring safety, quality of care and promote better outcomes

Predictive Technology
Leveraging big data for prediction of future outcomes, probabilities and trends

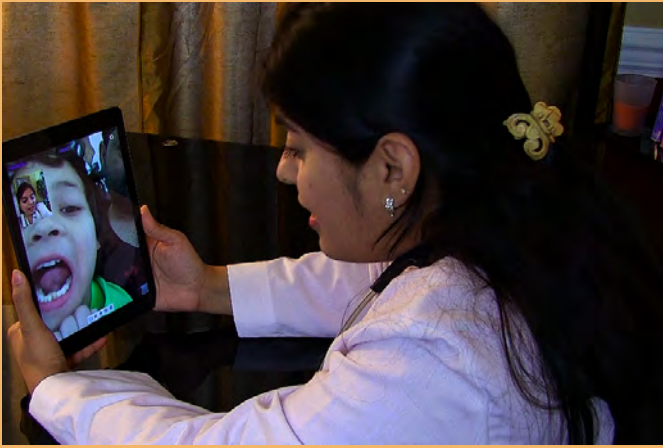

HMP Function
In-app callback request based on time of arrival for an "hold my place" experience

Omnicare Technology
Social self-service applications for Twitter, FB, and Web, with natural language understanding

Private Practice

Reduce patient attrition and promote engagement by providing the most advance Telemedicine experience via web and mobile apps.

Post-Acute Care

Responsive Telemedicine Solutions for your residents, their families and your community partners in a variety of locations (IPRs, SNFs, ALFs, and ILFs).

Remote Monitoring

Reduce Return to Acuity and Hospital readmissions with a real-time patient monitoring featuring an all in one integrated Telemed/Telehealth solution.

Motif-Based Predictive Monitoring

Using motifs for monitoring instead of basic thresholds increases the predictive accuracy of condition based alerts to improve outcomes at lower cost.

Built On Partnerships
